Software Developer

Software Developer | Application Security & Penetration Testing

Results-driven developer with a strong foundation in Cybersecurity and a growing focus on Application Security and Offensive Security. Experienced in building scalable web applications while identifying and mitigating security vulnerabilities using industry tools. Skilled in secure coding, API development, and penetration testing techniques. Passionate about bridging software development and security to build resilient systems.

WORK EXPERIENCE

Freelance Developer - Remote 2022 - Present

Full-Stack Developer

Worked with various clients to design, develop, and maintain web and software applications tailored to their business needs.

- Built and deployed responsive web applications using React, PHP, and MySQL, improving client operational efficiency.
- Designed and secured RESTful APIs, implementing authentication and input validation to prevent common vulnerabilities (e.g., XSS, SQL Injection).
- Optimized application performance, reducing load times and improving user retention.
- Conducted basic security testing on applications using tools like Burp Suite.

VIPH Nigeria Limited - Mowe, Ogun State 2023 - Present

Full-Stack Developer

Designed and developed web applications to support business operations, focusing on performance and security. Worked closely with teams to implement scalable solutions.

- Developed a **role-based school management system** using Laravel and MySQL, supporting secure authentication and access control and implemented **RBAC (Role-Based Access Control)** to enforce least privilege across user roles.
- Identified and mitigated common web vulnerabilities, improving application security.
- Optimized website performance, enhancing user experience and accessibility.
- Collaborated with stakeholders to gather requirements and deliver tailored software solutions.
- Implemented security best practices to safeguard applications from vulnerabilities.
- Optimized backend queries, improving system performance.

Nigeria Police Force (Lagos State CID) – Yaba, Lagos State September – December, 2025

Cybersecurity Intern

Cybercrime investigations and digital forensics

- Handling digital evidence with forensic tools.
- Understanding Nigerian cybercrime trends (SIM swap, phishing, online fraud, crypto-related crimes)
- Network and system security monitoring

Kajab Engineering Services – Anthony, Lagos State

April – September, 2026

Cybersecurity Intern

Network Security & Telecommunications Infrastructure

- Monitored network systems and telecommunications infrastructure to identify anomalies and potential security threats.
- Assisted in vulnerability assessments across network environments, supporting the identification of weaknesses in enterprise and transmission systems.
- Supported incident response activities by analyzing network traffic and assisting in threat detection and remediation.
- Worked alongside engineering teams on network operations, gaining exposure to RF planning, system maintenance, and infrastructure security.
- Contributed to implementing basic security controls to enhance the resilience of communication and IT systems.

EDUCATION

NIIT - Ikeja, Lagos State.

Diploma – Web Development

Chrisland University - Abeokuta, Ogun State.

B.Sc. – Cybersecurity

PROFESSIONAL SKILLS

- **Full-Stack Web Development** – Proficient in front-end and back-end technologies for building scalable applications.
- **Cybersecurity & Vulnerability Assessment** – Skilled in identifying and mitigating security threats to protect systems.
- **Software Development & Optimization** – Experience in designing efficient, high-performance software solutions.
- **Project Management & Collaboration** – Ability to manage projects, meet deadlines, and work effectively with teams.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, PHP, Python
- **Front-End Frameworks/Libraries:** React.js, Next.js
- **Backend Technologies:** Python, PHP, Laravel
- **Databases:** MySQL
- **Cloud Platforms:** AWS (Amazon Web Services)
- **Cybersecurity Tools:** Burp Suite, Metasploit, Wireshark
- **Version Control & DevOps:** Git, GitHub

Badges & Certificates

- **Cisco Certified Support Technician Cybersecurity (CCST Cybersecurity)**
Issued by: Cisco
Date: November 2025 [Verify](#)
- **CompTIA Security+**
Issued by: CompTIA
Date: April 2026 [Verify](#)
